

# MAGNETIC MANHOLE COVER LIFTERS

Safe and easy lifting of all metal  
manhole covers of underground  
utility networks

## Advantages

- ▶▶▶ Increased safety and efficiency
- ▶▶▶ Innovative magnetic assembly
- ▶▶▶ Protective waterproof wooden cover
- ▶▶▶ Compact design, durable and extremely lightweight stainless steel construction

# MAGNETIC HOIST HAMMER

NEW IN 2025

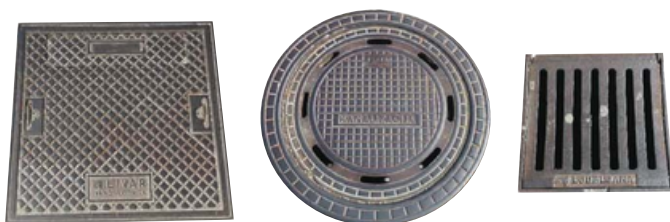

| SPECIFICATION      | MK130           | MK250           | MK250 Flex      |
|--------------------|-----------------|-----------------|-----------------|
| Magnet strength    | 130 kg          | 250 kg          | 250 kg          |
| Magnet diameter    | 60 mm           | 100 mm          | 100 mm          |
| Weight             | 2 kg            | 2 kg            | 2 kg            |
| Height             | 67 cm           | 67 cm           | 67 cm           |
| Hammer-shaped head | YES             | YES             | YES             |
| Flexible joint     | NO              | NO              | YES             |
| Material           | Stainless steel | Stainless steel | Stainless steel |

## NEW MK250 WITH FLEXIBLE KNUCKLE JOINT

- Easier handling
- Versatile tool – **allows lifting, tilting, and dragging covers**
- Self-standing function
- Enables two operators to work simultaneously

### MK250 / MK250 FLEX

For grates, sewers, and manhole covers

MK250 FLEX

MK250

MK130

### MK130

For valve covers, hydrants, and household connections.

Wooden protective cover

Ergonomically designed hammer head

Rubberized handle with reflective elements

Multipurpose hammer tip design

Everlasting stainless steel permanent magnetic base

## Features

- Opens covers even with damaged, broken handles, or filled with clay, sand, asphalt, etc.
- Saves time and energy while ensuring work safety
- Using magnets for opening and closing covers reduces dirt falling into manholes, prevents blockages

## Features

- Lightweight and powerful
- For larger and heavier covers
- Reliable grip on profiled and dirty surfaces
- Covers can be **lifted, tilted, or dragged**
- Flexible joint with selfstanding mode
- Rubber handles, reflective elements for safety
- Can be used alone or with the **WA-MK400 wheeled leverage adapter** (sold separately) for minimal physical effort of the operator

| SPECIFICATION   | MK400               | WA-MK400              |
|-----------------|---------------------|-----------------------|
| Magnet strength | 420 kg              |                       |
| Magnet surface  | 240 cm <sup>2</sup> |                       |
| Weight          | 4,7 kg              | 6,3 kg                |
| Height          | 75 cm               | 120X30X30 cm          |
| Flexible joint  | YES                 |                       |
| Material        | Stainless steel     | Stainless steel       |
|                 |                     | Rubber wheels Ø200 mm |
